This summary sheet provides information on tank-mixes conducted with this product. Corteva Agriscience" gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk. Important Note: Do not use any tank-mix if the mixture cannot be applied within the label recommendations for individual products or if specific trank-mix restrictions apply.

Larger, more complicated mixes; unisted mixes or repairing allernative products to those listed in this table are not endorsort. Individual products or if specific trank-mix restrictions apply.

Larger, more complicated mixes; unisted mixes or repairing allernative products to those listed in this table are not endorsort. Individual products or if specific trank-mix retrictions apply.

Larger, more complicated mixes; unisted mixes or packing allernative products to those listed in this table are not endorsort. Individual products or if specific trank-mix retrictions apply.

Larger, more complicated mixes; unistent the second control of the complication of the results of an industry recognised standard test. Ele aware that in the field, water hardness, per interpretative cr. can vary, Biological compatibility and as a based on a small number of field trais, Corteva Agriscience" cannot warrant the efficacy of other trank-mix particular Compatibility, or governous substances to such earth was a their own risk.

Larger products of the complication of the specific and the products of the compatibility, so governous sub-them issues at their own risk.

NOTES.

Throadway Star chould always be used with an approved adjuvent.

Denote mis Broadway Star Willo Des, MCDR and Dicemba.

To products containing MCPA or Dicemba respect a 14 day interval between them and Broadway Star.

Do not harrow or roll within 7 days before or after an application of Broadway Star.

KEY:
ISword is supported in mix with Broadway Star up to the end of February.

\*\*Residual herbicides can be used in mixture or short sequence with Broadway Star, while conditions are favourable for both products to work and weeds are small and actively growing. However, once soil moisture declines to reduce residual activity then a 4 week interval between the residual herbicide and an application of Broadway Star is recommended to maximise grass weed control and the tank-mix is no longer supported.

\*\*To not exceed maximum total dose of fioresulam within growings eason.

\*\*To not use this mix! If the crop is under stress as there is the increased risk of an additive PGR effect and possible crop damage.

\*\*Corteva Agriscience only support Broadway Star in a 2-way tank mix with half rate chlormequat due to crop safety issues. An interval of at least 7 days must be regarded before applying a higher rate of chlormequat or any other PGR.
